PROFESSIONAL SUMMARY

Frontend engineer with 6+ years building scalable web apps in React, TypeScript, and Node.js. Expert in React architecture, design systems, and performance optimization. Experienced in integrating AI/LLM workflows and building agentic UI experiences. Proven track record of leading cross-functional projects and mentoring junior developers.

EXPERIENCE

SENIOR FRONTEND DEVELOPER

zigzag GmbH, Stuttgart — ***10/2022 – 08/2026***

- Shipped React/TypeScript features for healthcare, transportation, and finance; built reusable UI components adopted across 3+ products, shaping shared frontend standards and cutting duplicate code by 30%.
- Designed AI-assisted feature using LLM API and agentic workflow, automating a repetitive front-end task and reducing manual effort by 50%.
- Developed Node.js APIs/services, expanding backend capabilities and enabling full-stack delivery.
- Leveraged GitHub Copilot and Claude to accelerate code review and feature delivery by 20%.
- Built agentic UI components that handle streaming model outputs and long-running async tasks over WebSockets, improving real-time user feedback.
- Collaborated with designers and backend engineers in Agile/Scrum to deliver end-to-end features, integrating complex REST APIs, optimizing performance, and testing with Jest and Playwright in Git based workflows.
- Mentored junior developers, reducing onboarding time by 20%.

FRONT-END DEVELOPER

Huawei, Istanbul — ***10/2021 – 09/2022***

- Developed enterprise Angular/TypeScript apps; built and customized reusable components for internal UI library used by 5+ teams.
- Improved scalability and maintainability via NGXS/NgRx state management, reducing state-related bugs by 25%.
- Sole frontend developer; led AngularJS to Angular 11 migration, modernizing legacy code while maintaining zero downtime.
- Delivered features on time in Scrum/Agile, collaborating with backend teams to integrate APIs and build new UIs.

FRONT-END DEVELOPER

Etiya, Istanbul — ***10/2019 – 10/2021***

- Built responsive interfaces for mobile/desktop using Angular 7, TypeScript, HTML, CSS, SCSS.
- Integrated REST APIs and collaborated with business analysts to deliver features on schedule.
- Applied RxJS to manage async workflows, improving UI responsiveness by 40%.

EDUCATION

BACHELOR DEGREE IN COMPUTER ENGINEERING

Namık Kemal University — ***09/2014 – 06/2019***
